

**Before IR, most people
farmed & lived in small villages.**

**Work is
accomplished by cottage
industry. Goods are
produced in the home.**

**Common land
used for planting
crops & keeping
livestock.**

**Great Britain had lots of
coal and iron ore.**

**These were used to make
iron, steel, & machines**

**Enclosure movement leads to
more workers that move to
city for work**

**Factory System is when workers &
machines are brought together in
one place outside the home.**

**These changes were known
as the
Industrial Revolution**
